Procurement of CSE

PEs are authorized to procure CSEs from other sources in any of the following instances:

- a) If the CSE is unavailable due to zero inventory, in which case the Procuring Entity shall secure a Certificate of Non-Availability of Stocks by downloading from the PhilGEPS Electronic Catalogue;

Sec. 40 of the IRR of RA No. 12009

Procurement of CSE

- c) If the available stock of the CSE is not sufficient to meet the required quantity of the Procuring Entity, in which case the Procuring Entity shall generate and download the current Stock Position Report from the PhilGEPS Electronic Catalogue showing the available stock at the specific time and date of access; and
- d) When the BAC, upon recommendation of the End-User or Implementing Unit, has resolved that the procurement from other sources is for reasons of efficiency, practicality, or economic viability. To support this, the End-User or Implementing Unit shall submit its written recommendation to the BAC identifying the specific reason and providing justifications thereof. To ensure proper monitoring of this instance, which could aid the PS-DBM in addressing gaps in supply chain and inventory management, the Procuring Entity shall inform the PS-DBM by filling out and submitting an online form available in the PhilGEPS Electronic Catalogue.

Sec. 40 of the IRR of RA No. 12009

Procurement of CSE

In assessing the existence of the foregoing reasons, Procuring Entities may refer to the following instances:

- i) Inefficiency – Procurement from the PS-DBM will require extensive time and effort on the part of the Procuring Entity leading to wastage, delays or errors compared to conventional procurement methods.
- ii) Impracticality – Procurement from the PS-DBM will be excessively difficult due to an unforeseen event or a lack of feasible means or access, which includes no internet connectivity or geographical limitations.
- iii) Economic Non-viability – Procurement from the PS is not sustainable since it will not result in realized savings for the government in the long-term. This may pertain to the cost where it would be more expensive, or non-cost factors such as issues in product quality and life cycle cost considerations.

Sec. 40 of the IRR of RA No. 12009

Procurement of CSE

Due to the efficiency and economy of bulk purchasing, the PS-DBM may deal directly with manufacturers or exclusive distributors subject to legal, technical, and financial requirements ensuring that products are obtained from reliable sources, of the best quality, and at the most advantageous price for the whole government. Access to goods and equipment in economic lot sizes may likewise be achieved by PS-DBM through consignment or any appropriate contractual arrangement.

Sec. 40 of the IRR of RA No. 12009

Procurement of CSE

Consignment shall refer to an arrangement whereby the consignor gives actual or constructive possession of goods, equipment and services to the consignee without transfer of ownership and disbursement of government funds between consignee and consignor, and such goods, equipment and services are to be sold by the consignee for and on account of the consignor at terms advantageous to the government. The consignee shall remit the proceeds of the sale to the consignor, net of service fees, if applicable. **The PhilGEPS eMarketplace may be used as a consignment platform for goods and equipment.**

Consignment agreements shall primarily be governed by the general law on contracts, considering that the transaction involved is not procurement as defined under Section 5(z) of this IRR.
